

WHIZZ KIDZ

We're here
for young
wheelchair
users

Kiyō-Rei was over the moon she wouldn't stop talking about her wheelchair!

7 year old Kiyō-Rei loves to paint, play with sand and dance. She was diagnosed with Kniest Syndrome, a bone growth dysfunction, which causes dwarfism. She was told she was 'too small and too young' for a wheelchair, meaning she had to shuffle on her bum around her home, causing exhaustion and pain.

Whizz Kidz is there for young wheelchair users. We were able to work with Kiyō-Rei to build her own powered wheelchair. She is now able to get around easily, has grown in confidence and her mum said:

“We are so thankful to Whizz Kidz and their supporters for her wheelchair it has brightened up her journey.”
